### Signal Mountain Pest Control Rebrands to Signal Pest Control: Expands Services Across Chattanooga and North Georgia

Chattanooga, TN — June 08, 2025— After years of proudly serving the mountaintop community of Signal Mountain, Signal Mountain Pest Control is excited to announce a new name and an expanded mission. The company will now be known as Signal Pest Control, a move that reflects its commitment to bringing 5-star rated pest control services to a broader region, including the entire Chattanooga and Hamilton County area and surrounding towns like Ooltewah, Collegedale, Apison, and extending into North Georgia communities.

“We’re coming down from the mountain and into the heart of Chattanooga and beyond,” says Josh Baker, founder of Signal Pest Control. “Our new name honors our roots but also reflects our growth and expanded reach. No matter where you live in Hamilton County or just over the state line, we’re here to protect your home with the same top-rated service our mountain clients have trusted for years.”

### A New Look, a Greener Future

Alongside the name change, Signal Pest Control is unveiling a fresh new green-themed look that highlights its continued dedication to eco-friendly, family-safe pest control.

“At Signal Pest Control, your family’s health and safety come first,” Josh Baker explains. “That’s why we use green pest control products that are

tough on pests but gentle on people, pets, and the environment. We believe that effective pest control shouldn't come at the cost of your well-being."

### Backed by Hundreds of 5-Star Reviews

Signal Pest Control brings with it a legacy of customer satisfaction, with over 474 5-star reviews to its name. The company's Home Defender Guarantee assures clients that they will receive effective, courteous, and safe service every time.

### About Signal Pest Control

Founded on Signal Mountain and headquartered there with outlying service centers located in Hamilton County, Signal Pest Control offers comprehensive pest management solutions that include residential and commercial treatments for ants, spiders, termites, rodents, and more. The company specializes in using environmentally responsible products and methods to ensure safe, long-lasting protection for your home or business.
